

Jordan Mark Barbone, M.A.

Data Scientist, R Developer

*R programmer with experience in statistical
programming, monitoring, and report automation in
cognitive and CNS clinical trials*

Experience

Jun 2021 - **Data Scientist**, *Cogstate*, New Haven, CT (Remote).

- Present
- Independently developed internal R packages to advance programming, visualization, normative data management, central monitoring, data access, and general utilities
 - Refactored Data Engineering code into a Python package for data transformations within Azure Databricks
 - Refactored legacy code to seamlessly integrate PySpark functionalities and enforce best coding practices
 - Designed and implemented an efficient process for managing and updating and tracking normative data, collaborating closely with Science and Product Management teams
 - Authored comprehensive standards and protocols for Jira workflows and Git management, ensuring consistency and efficiency
 - Developed and managed a robust daily and weekly reporting system for the monitoring of a high-profile international Alzheimer's Disease trial
 - Analyzed and interpreted requirements from Science and Data Management to drive strategic advancements within our Data Lakehouse
 - Developed, reported, and presented analyses for custom data queries related to both ongoing and concluded clinical, providing actionable insights for rater training and central monitoring
 - Automated data extraction, reformatting, and storage processes for academic research studies, greatly enhancing accessibility for end-users
 - Contributed to the creation of poster materials for industry conferences and presentations, showcasing research, developments, and services

Dec 2019 - **Principal Data Analyst**, *Madrigal Pharmaceuticals*, Conshohocken, PA.

- Jun 2021
- Developed, analyzed scripts and packages in R; developed custom functions, analytic packages for creation of daily metrics and reports; unit testing, documentation; maintained source code control
 - Aggregated and organized data sources in STDM, ADaM, TFLS, and pre-finalized formats; compiled source data from multiple vendor data bases and reports; reconciled differences between databases
 - Analyzed efficacy, safety, and exploratory data for: ongoing phase 3 studies in NASH and NAFLD; ad hoc analyses for phase 2; biomarker and patient reported outcomes
 - Used, reviewed, and reported on statistical testing such as: ANCOVA, LS-Means, ROC, Kruskal-Wallis, Wilcoxon rank sum, t-test, correlations (Pearson product, Spearman rho, Kendall's tau)
 - Trained and onboarded data analyst

West Chester, PA

1/3

Jan 2019 - **Clinical Data Scientist**, *Signant Health (Formerly Bracket and CRF Health)*,
Nov 2019 Wayne, PA.

- Interacted with and analyzes CNS, psychiatry, and neurology clinical trial data quality and outcomes information for clinical insights
- Developed and implemented new data products and deliverables for blinded, statistical data monitoring and review; maintained and enhanced current data products; advised new analytic and machine learning initiatives; identified data sources and aggregation processes; defined and updated processes for deliverables; point of contact for analytic deliverables; presented information using data visualization techniques
- Reviewed and developed analyses with SME for detection of errors for study endpoints; collaborated with review of analytic findings
- Trained and supervised of Data Scientists; developed and provided training for new and current processes, programming, and technologies/software; lead, organized team meetings and status updates; wrote and reviewed new process documentation.
- Assisted Program Managers and Project Delivery Managers for process implementation for data products and deliverables for blinded, statistical data monitoring and review; provided consultation for programming and development for Clinical Data Management; liaised between Data Services and Clinical Science teams; provided analytic and research support for Clinical Science

Jan 2018 - **Clinical Data Specialist**, *Bracket*, Wayne, PA.

- Dec 2018
- Interacted with and analyzes CNS, psychiatry, neurology clinical trial data quality and outcomes information for clinical insights; collaborated with other Bracket stakeholders and teams to execute and provide ongoing analysis related to study deliverables or internal needs
 - Developed training material development and QC; performed data review, eCOA user acceptance testing; study staff contact, sponsor contact, contact with outside experts, report writing.
 - Maintained, classified clinical information/materials; reviewed scale administration/scoring; provided clinical feedback, remediation for raters

May 2016 - **Clinical Associate**, *Bracket*, Wayne, PA.

- Dec 2017
- Participated in applicable aspects of clinical content development and delivery, including training material development and QC, data review, eCOA user acceptance testing, study staff contact, sponsor contact, contact with outside experts, and report writing
 - Maintained, classified clinical information/materials for CNS, psychiatry, neurology clinical trials
 - Provided data review for Bracket's Endpoint Reliability programs; clinical analysis on study endpoint data for administration and scoring calibration to standard training principles; and provided remediation as needed to recalibrate to study standards.

Aug 2015 - **Clinical Assistant**, *Bracket*, Wayne, PA.

- May 2016
- Developed object specific video material, clinical content for training and qualification programs for study staff in clinical trials; addressed and reviewed data quality issues; clinical scheduling; ensured compliance with quality assurance, participate in reporting, analysis activities and research activities (e.g., collection and dissemination of literature and/or data); prepared reports of clinical activities.

2/3

Aug 2014 - **Writing Tutor**, *Learning Assistance & Resource Center, West Chester University of Pennsylvania*, West Chester, PA.

- Tutored in 1-2 person sessions to develop skills necessary for effective writing, as well promoted independent and active learning.
- Monitored efficiency of the Academic Development Program and growth of students through maintaining daily session activity logs, utilizing Bloom's Taxonomy, biweekly student reports, and semester evaluations.

Education

Class of 2019 **West Chester University of Pennsylvania**, *Master of Arts*, West Chester, PA.

- General Psychology, Advisor: Geeta Shivde, Ph.D.
- Thesis: The effects of participant-selected background music on executive function task performance
- GPA: 4.00

Class of 2015 **West Chester University of Pennsylvania**, *Bachelor of Arts*, West Chester, PA.

- Major in Psychology, Minor in Biology
- Cumulative GPA: 3.470
- Major GPA: 3.834

West Chester, PA
