Experience

Principal, Data Platform

Sep 2026 - Present

Cogstate

New Haven, CT (Remote)

- Created and implemented development standards for Data Engineers and Data Scientists
- Provided supervision and training for Data Scientists, Data Engineers, and Data Visualization resources
- Architected and implemented a CI/CD process for **Databricks** testing through **GitHub** actions and **Databricks** alerts

Senior Data Scientist

Oct 2024 - Sep 2026

Cogstate

New Haven, CT (Remote)

- Refactored legacy data ingestion processes into **Databricks** centered, **pyspark** coded scheduled jobs with 70
- Developed configuration schemas and validation process centered around **git** to allow broader team input into processes while maintaining data quality
- Developed logging and alerting systems in **Databricks** and **SQL** alerts for potential data quality issues to streamline responses to outside team members
- Maintained and improved Statistical Monitoring program in **R** for outcome anomaly detection for Clinical Trials
- Developed **SQL** queries for Tableau dashboards
- Refactored Statistical Monitoring program in **R** reducing runtimes by 50
- Provided supervision and input for Data Scientist, Data Engineer, and Data Visualization resources

Data Scientist

Jun 2021 - Oct 2024

Cogstate

New Haven, CT (Remote)

- Independently developed internal **R packages** to advance programming, visualization, normative data management, central monitoring, data access, and general utilities
- Designed and development **R shiny** applications for displaying central monitoring activity and performing interactive analyses
- Refactored Data Engineering **PySpark** code into a **python** package for data transformations within **Azure Databricks** and **DeltaTable** management
- Refactored legacy **SQL** code to seamlessly integrate **PySpark** functionalities and enforce best coding practices
- Designed and implemented an efficient process for managing and updating and tracking normative data, collaborating closely with Science and Product Management teams
- Authored comprehensive standards and protocols for **Jira** workflows and **git** management, ensuring consistency and efficiency
- Developed and managed a robust daily and weekly reporting system with **R tidyverse** scripts for the monitoring of a high-profile international Alzheimer's Disease trial
- Analyzed and interpreted requirements from Science and Data Management to drive strategic advancements within our Data Lakehouse
- Developed, reported, and presented analyses with **R tidyverse** scripts for custom data queries related to both ongoing and concluded clinical, providing actionable insights for rater training and central monitoring
- Developed a **python** data extraction, reformatting, and storage processes for academic research studies, greatly enhancing accessibility for end-users
- Contributed to the creation of poster materials for industry conferences and presentations, showcasing research, developments, and services

Principal Data Analyst

Dec 2019 - Jun 2021

Madrigal Pharmaceuticals

Conshohocken, PA

- Developed internal **R packages** with **tidyverse** features for the creation of daily metric and reports
- Aggregated and organized data sources in STDm, ADaM, TFLS, and pre-finalized formats; compiled source data from multiple vendor data bases and reports; reconciled differences between databases using **R tidyverse** suite
- Analyzed efficacy, safety, and exploratory data for: ongoing phase 3 studies in NASH and NAFLD; ad hoc analyses for phase 2; biomarker and patient reported outcomes with **R**
- Reviewed and reported on statistical testing in **R** such as: ANCOVA, LS-Means, ROC, Kruskal-Wallis, Wilcoxon rank sum, t-test, correlations (Pearson product, Spearman rho, Kendall's tau)
- Trained and onboarded data analyst

Education

Master of Arts

West Chester, PA

West Chester University of Pennsylvania

Class of 2019

- General Psychology, Advisor: Geeta Shivde, Ph.D.
- Thesis: The effects of participant-selected background music on executive function task performance
- GPA: 4.00

Bachelor of Arts

West Chester, PA

West Chester University of Pennsylvania

Class of 2015

- Major in Psychology, Minor in Biology
- Cumulative GPA: 3.470
- Major GPA: 3.834
