EDUCATION

West Chester University of Pennsylvania — West Chester, PA
Master of Arts — Aug 2017 - May 2019

West Chester University of Pennsylvania — West Chester, PA
Bachelor of Arts — Aug 2011 - May 2015

EXPERIENCE

Cogstate — New Haven, CT (Remote)
Principal, Data Platform — Sep 2026 - Present

- *I just started – give me some time*

Cogstate — New Haven, CT (Remote)
Senior Data Scientist — Oct 2024 - Sep 2026

- Refactored legacy data ingestion processes into **Databricks** centered, **PySpark** coded scheduled jobs with ~70% reduction of time and ~50% reduction in cost; ingestions managing **REST API** responses, and **xlsx**/**csv** files in **SharePoint** with insert, update, and delete history preservation
- Developed configuration schemas and validation process centered around **git** to allow broader team input into processes while maintaining data quality
- Refactored Statistical Monitoring program in **R** reducing runtimes by ~50% and improving development scaling and unit test coverage

Cogstate — New Haven, CT (Remote)
Data Scientist — Jun 2021 - Oct 2024

- Independently developed internal **R packages** to advance programming, visualization, normative data management, central monitoring, data access, and general utilities
- Refactored Data Engineering **PySpark** code into a **python** package for data transformations within **Azure Databricks** and **DeltaTable** management
- Developed and managed a robust daily and weekly reporting system with **R tidyverse** scripts for the monitoring of a high-profile international Alzheimer's Disease trial

SKILLS

R	statistical programming, package development, Shiny app development, tidyverse pipelines, Quarto/R Markdown reporting, and trial monitoring analytics
Python	PySpark data engineering, Databricks jobs, reusable package-based transformations, API and file ingestion workflows, and data automation
SQL	query development for analytics and dashboards, data quality checks, and alert-oriented monitoring workflows
Data Platforms	Databricks, Delta Lake patterns, CI/CD with GitHub Actions, configuration-driven processing, and operational logging/alerting
Clinical Research Analytics	clinical trial data review, centralized/risk-based monitoring, cognitive outcomes support, and rater-focused analytics and reporting
Collaboration & Workflow	Git-based collaboration, standards development, cross-functional data/science partnership, and reproducible analysis practices

R PACKAGES

cnd · echo · fuj · mark · openxlsx2 · scribe
