*R programmer with experience in statistical
programming, monitoring, and report automation in
cognitive and CNS clinical trials*

Experience

Data Scientist

Jun 2021 - Present

Cogstate

New Haven, CT (Remote)

- Independently developed internal `\textbf{R}` packages to advance programming, visualization, normative data management, central monitoring, data access, and general utilities
- Designed and development `\textbf{R shiny}` applications for displaying central monitoring activity and performing interactive analyses
- Refactored Data Engineering `\textbf{PySpark}` code into a `\textbf{python}` package for data transformations within `\textbf{Azure Databricks}` and `\textbf{DeltaTable}` management
- Refactored legacy `\textbf{SQL}` code to seamlessly integrate `\textbf{PySpark}` functionalities and enforce best coding practices
- Designed and implemented an efficient process for managing and updating and tracking normative data, collaborating closely with Science and Product Management teams
- Authored comprehensive standards and protocols for `\textbf{Jira}` workflows and `\textbf{git}` management, ensuring consistency and efficiency
- Developed and managed a robust daily and weekly reporting system with `\textbf{R tidyverse}` scripts for the monitoring of a high-profile international Alzheimer's Disease trial
- Analyzed and interpreted requirements from Science and Data Management to drive strategic advancements within our Data Lakehouse
- Developed, reported, and presented analyses with `\textbf{R tidyverse}` scripts for custom data queries related to both ongoing and concluded clinical, providing actionable insights for rater training and central monitoring
- Developed a `\textbf{python}` data extraction, reformatting, and storage processes for academic research studies, greatly enhancing accessibility for end-users
- Contributed to the creation of poster materials for industry conferences and presentations, showcasing research, developments, and services

Principal Data Analyst

Dec 2019 - Jun 2021

Madrigal Pharmaceuticals

Conshohocken, PA

- Developed internal `\textbf{R}` packages with `\textbf{tidyverse}` features for the creation of daily metric and reports
- Aggregated and organized data sources in STDM, ADaM, TFLS, and pre-finalized formats; compiled source data from multiple vendor data bases and reports; reconciled differences between databases using `\textbf{R tidyverse}` suite
- Analyzed efficacy, safety, and exploratory data for: ongoing phase 3 studies in NASH and NAFLD; ad hoc analyses for phase 2; biomarker and patient reported outcomes with `\textbf{R}`
- Reviewed and reported on statistical testing in `\textbf{R}` such as: ANCOVA, LS-Means, ROC, Kruskal-Wallis, Wilcoxon rank sum, t-test, correlations (Pearson product, Spearman rho, Kendall's tau)
- Trained and onboarded data analyst

Clinical Data Scientist

Jan 2019 - Nov 2019

Signant Health (formerly Bracket and CRF Health)

Wayne, PA

- Interacted with and analyzes CNS, psychiatry, and neurology clinical trial data quality and outcomes information for clinical insights
- Developed and implemented new data products and deliverables for blinded, statistical data monitoring and review; maintained and enhanced current data products; advised new analytic and machine learning initiatives; identified data sources and aggregation processes; defined and updated processes for deliverables; point of contact for analytic deliverables; presented information using data visualization techniques
- Reviewed and developed analyses with SME for detection of errors for study endpoints; collaborated with review of analytic findings
- Trained and supervised of Data Scientists; developed and provided training for new and current processes, programming, and technologies/software; lead, organized team meetings and status updates; wrote and reviewed new process documentation.
- Assisted Program Managers and Project Delivery Managers for process implementation for data products and deliverables for blinded, statistical data monitoring and review; provided consultation for programming and development for Clinical Data Management; liaised between Data Services and Clinical Science teams; provided analytic and research support for Clinical Science

Clinical Data Specialist

Jan 2018 - Dec 2018

Signant Health (Bracket)

Wayne, PA

- Interacted with and analyzes CNS, psychiatry, neurology clinical trial data quality and outcomes information for clinical insights; collaborated with other Bracket stakeholders and teams to execute and provide ongoing analysis related to study deliverables or internal needs
- Developed training material development and QC; performed data review, eCOA user acceptance testing; study staff contact, sponsor contact, contact with outside experts, report writing.
- Maintained, classified clinical information/materials; reviewed scale administration/scoring; provided clinical feedback, remediation for raters

Education

Master of Arts

West Chester, PA

West Chester University of Pennsylvania

Class of 2019

- General Psychology, Advisor: Geeta Shivde, Ph.D.
- Thesis: The effects of participant-selected background music on executive function task performance
- GPA: 4.00

Bachelor of Arts

West Chester, PA

West Chester University of Pennsylvania

Class of 2015

- Major in Psychology, Minor in Biology
- Cumulative GPA: 3.470
- Major GPA: 3.834
